ROSOBORONEXPORT

BSK-M

Covert. Multifunctional. Reliable.

Unattended Ground Sensors for any Application. Concealed and Field Proven.

- ▶Early warning;
- ▶On-the-fly deployment;
- ▶Concealed intruder detection;
- ▶Standalone operation;
- ▶Wireless alarm transmission.

A completely covert BSK-M detector senses any changes in the magnetic field caused by presence of metal material within its detection area. The sensor features no dead zones and is suitable for any soil and terrain.

Main characteristics:

- Operation time on fully charged battery, days: 270
- Detection zone length, m: 30
- Detection zone width, m: 3
- Operating temperature range, °C: -40...50
- Maximum data transmission range, m: 10000
