

1124M1

The Project 1124M ship is the base platform for different-purpose ships. Its development was based on the experience of developing and operating ships of this class.

The following variants of the project are available:

- Project 1124M antisubmarine warfare (ASW) ship is designed to destroy enemy surface and underwater targets, while operating independently or as part of a task force, to counter single air targets and sabotage/terrorist assets, provide fire support to ground forces operating in the maritime sector, protect coastal lines of communication and interdict the enemy's sea lines of communications, perform escort, reconnaissance and patrol missions;
- Project 1124M1 fire support ship is designed to provide fire support to ground forces operating in the maritime sector, protect coastal lines of communication and interdict the enemy's sea lines of communications, fight enemy surface and underwater targets independently and as part of a task force, perform reconnaissance and patrol missions, assist border troops in border protection, counter single air targets and sabotage/terrorist assets;
- Project 1124M2 Coast Guard ship is designed to patrol and protect maritime borders and exclusive economic zone, counter enemy surface and underwater targets independently and as part of a task force, provide for defense of naval bases, participate in reconnaissance actions, guard and protect coastal shipping, support marine operations and show the flag in the areas of public interest.

Características básicas:

- Main propulsion* type, layout, output, kW: diesel, three-shaft CODAD, 2x6620 + 1x1030
- Electric power system output, kW: 1x500+2x200
- Full displacement, t: about 1000
- Length x beam x draft, m: 71,2x10,3x3,4
- Speed, kt:
 - full: 24
 - economic: 10
- Range at economic speed, nm: 3000
- Endurance, days: 15
- Seaworthiness: :
 - stay at sea: unlimited
 - weapons employment: 4
- Crew: 67
- Main armament:
 - Strike missiles: Grad-M MRL

- Artillery:
 - 76.2mm AK-176M gun:
 - 76.2mm AK-630M CIWS:
 - 2x14.5mm MTPU:
- Artillery/air defense fire control systems: MR-123-02 Bagira RCS
- Sensors and electronics:
 - Integrated bridge system: +
 - Joint safe weapon employment system: Segment
 - Combat management system (CMS): Sigma-E
- Navigation equipment:
 - Navigation radar: Gorizont-25 navigation radar with two indicators (part of Gorizont-25 INS)
 - GPS receiver: Gorizont-25E INS consisting of Gorizont-25 navigation radar with two MK-54IS indicators, two electronic mapping systems and two GPS NT-200D satellite receivers
- EW assets:
 - Active: TK-25E
 - Passive: 4x10 PK-10

АО «Рособоронэкспорт» – единственная в России государственная организация по экспорту всего спектра продукции, услуг и технологий военного и двойного назначения. Входит в Госкорпорацию Ростех. «Рособоронэкспорт» образован 4 ноября 2000 года и является одним из лидеров мирового рынка вооружений. На долю компании приходится более 85% экспорта российских вооружения и военной техники. «Рособоронэкспорт» взаимодействует с более чем 700 предприятиями и организациями оборонно-
