Mi-26T2

The most weight-lifting helicopter

The biggest and mightiest helicopter. It outperforms any existing heavy-transport helicopter in terms of weight-lifting capability and range of cargoes delivered.

Mi-26T2 heavy-lift helicopter is designed to provide airlifting of self-propelled machinery (both wheeled and tracked) and non-self-propelled machinery, bulky cargoes weighing up to 20 tons (44,100 lbs) both in the cargo cabin and on external sling. Moreover, it can be operated for transportation of paratroopers and medical evacuation of wounded.

The helicopter can be applied in a transport, assault, medical, firefighting and refueling tanker versions.

Mi-26T2 provides delivery of servicemen, cargoes and fuel to hard-to-reach areas with a capability of landing on unprepared helicopter pads.
