

TBG-7V

Heavy Damage Guaranteed

TBG-7V is a Thermobaric Rocket designed to inflict heavy casualties on the enemy manpower in the open and inside fortifications, but vehicles are also at risk.

TBG-7V is a Rocket with Thermobaric warhead which provides infantry and other units with higher tactical self-sufficiency and augmented firepower. The design of the Rocket allows RPG operator to engage all types of light armoured vehicles, manpower inside fortifications and trenches while hitting the target at any angle and exploding within couple of meters from the enemy. Thermobaric warhead inflicts damage by blast, fragmentation and incendiary effects.

Main characteristics:

- Warhead type: HE, thermobaric and fragmentation
- Caliber: 105mm
- Weight: 4.5 kg
- Effective range (depending on the launcher): up to 500m
- Destructive capacity (inside) : 300m³
- Direct trajectory: 240m
