

RPO-Z

The RPO-A, RPO-D and RPO-Z flamethrowers are a lethal fire weapon intended for reinforcing and supporting the motorized infantry, airborne and other units.

The RPO-A infantry rocket flamethrower is designed to:

- destroy fortified buildings, ground or semi-hardened buildings made of stone, brick or concrete;
- disable light armored and motor vehicles;
- incapacitate enemy manpower located both in the open and in the various types of buildings and structures.

The RPO-D infantry rocket flamethrower is designed to blind enemy fire weapon crews, including ATGM crews, and observation posts with smoke.

The RPO-Z flamethrower is designed to spread fires in a variety of buildings and structures, vehicles, and in the open areas covered with flammable vegetation.

Main characteristics:

- Caliber, mm: 93
- Length, mm : 920
- Weight, kg : 12
- Range of fire, m: :
 - max : 1000
 - sighting : 600
 - min : 25
- Operating temperature range, °C:
 - RPO-Z : от -40 до +50
