

## Rosoboronexport to present Russian special equipment and weapons at MILIPOL PARIS 2013

Rosoboronexport, part of the Rostec State Corporation, will demonstrate special small arms and special equipment at the MILIPOL 2013 Worldwide Exhibition of Internal State Security to be held from 19 to 22 November in Paris.

The Company will showcase equipment for special operation forces (Tigr armored car, BTR-80A armored personnel carrier, Mangust boat) and technical means for building integrated land and sea border surveillance systems as well as security systems for sensitive sites. It is expected that foreign delegations will pay increased attention to noiseless and flashless sniper rifles and submachine guns, GM-94 and 6G30 special grenade launchers firing non-lethal ammunition.

Most of the special equipment offered for export has been used successfully by Russian law enforcement agencies. Its effectiveness and reliability contribute to steady annual growth in export deliveries and expansion in sales geography.

“Rosoboronexport alone is presenting more than 70 modern models of weapons and equipment for special operation units. TsNIITOCHMASH, IZHMASH, and Tula Arms Plant, too, have their own major booths. Such a large-scale participation of the Russian delegation in the exhibition will allow would-be partners to get acquainted with a substantial number of military products in this market segment,” – said Valery Varlamov, Head of Rosoboronexport’s Security Department, who leads the Company’s delegation at the exhibition.

During the exhibition, Rosoboronexport will also hold negotiations with leading European defense companies, particularly with Nexter Group, SAFRAN and THALES on industrial cooperation, technology transfer and localizing production of some components for electro optical and thermal imaging systems in Russia.

Rosoboronexport, a subsidiary of the Rostec Corporation, is the sole state-owned arms trade company in the Russian Federation authorized to export the full range of military and dual-purpose products, technologies and services. Rosoboronexport is one of the leading world arms exporters to the international market. Its share in Russia's military exports exceeds 80 percent. Rosoboronexport cooperates with more than 700 enterprises and organizations in the Russian defence industrial complex. Russia maintains military technical cooperation with more than 70 countries around the world.

The Russian corporation Rostec was established in 2007 with the purpose to render assistance to industries in the development, production and export of high-technology military and civil-purpose products. It comprises 663 enterprises grouped into eight holding companies in the defence industrial complex, and five holding companies in civil industry branches. The Rostec subsidiaries are located in 60 regions of the Russian Federation, and export their products to more than 70 countries worldwide.
