

Rosoboronexport to Bring 250-plus Pieces of Equipment to SITDEF-2017 in Peru

Rosoboronexport, a member of Rostec, is going to set up a joint Russian display booth at the 6th International Defense Technology Exhibition SITDEF-2017 to take place at the Army HQ, Lima, Peru, on May 18-21.

Deputy Director of the Federal Service for Military and Technical Cooperation Anatoly Punchuk will lead Russia's official delegation, while Deputy Director General of Rosoboronexport Sergey Ladygin was named the head of the company's team at the event.

"Military and technical cooperation of Russia and Peru has a long and vibrant history and today Rosoboronexport consistently takes measures to shape long and mutually beneficial work adjusted to modern trends on the world arms market. We offer to Peru and our other partners in Latin America the widest spectrum of ways for cooperation from supply of Russian defense products to various forms of technological partnerships, including joint development of military equipment. Such flexibility in the way we work with our customers coupled with rather appealing offers as far as cost-effectiveness goes provides Rosoboronexport with a very solid place on the Latin American arms market," says Sergey Ladygin.

The joint Russian display will be deployed at stands 128 and 124A, Inka pavilion. Rosoboronexport's booth will provide information on 250-plus military products. Many of them were put to action by the Russian Aerospace Force in Syria, where they proved to be reliable, trouble-free and quality weapons suitable for deployment in combat.

In the aviation sector the most promising future faces the Yak-130 combat-trainer, MiG-29M multi-role front-line fighter, and Su-30MK aircraft. Noteworthy is the heightened interest of customers to the Mi-171Sh troop-carrying helicopter, Mi-28NE attack helicopter, and Mi-35M gunship with troop-carrying capability.

Armed forces in Latin America are also expected to pay attention to Army equipment, particularly, the T-90S tank, as well as BTR-80A and BTR-82A APCs. Russian AD systems, namely the Tor M2KM and Buk-M2E SAM systems, Pantsir-S1 AA gun-missile system, and Igla-S man portable AD system, are believed to stand good chances in the region as well. The S-400 Triumph and Antey-2500 long-range SAM systems will doubtless get their share of attention.

With such challenges as terrorism, drug trafficking, organized and cyber crimes on the rise, Rosoboronexport expects the Comprehensive Security System Project to gather crowds of foreign customers. It contains integrated solutions to issues like cyber security, air and coastal zone management, control of state borders, large municipalities, administrative entities and facilities.

Rosoboronexport is the only state-owned arms trade company in the Russian Federation authorized to export the full range of military and dual-purpose products, technologies and services. It is a subsidiary of the Rostec Corporation. Founded on 4 November, 2000, now Rosoboronexport is one of the leading world arms exporters to the international market. Its share in Russia's military exports exceeds 85 percent. Rosoboronexport cooperates with more than 700 enterprises and organizations in the Russian defence industrial complex. Russia maintains military technical cooperation with more than 70 countries around the world.

Rostec Corporation is a Russian corporation that was established in 2007 to facilitate the development, production and export of high-tech industrial products designed for civilian and military applications. The corporation comprises over 700 organizations that are currently part of eleven holding companies operating in the military-industrial complex and three holding companies working in civilian sectors. The group also includes more than 80 direct management companies. Rostec's portfolio includes such well-known brands as AVTOVAZ, KAMAZ, Kalashnikov Concern, Russian Helicopters, VSMPO AVISMA, etc. Rostec companies are headquartered in 60 entities of the Russian Federation and supply products to more than 70 countries. In 2015, the consolidated revenue of Rostec reached RUB 1.14 trillion. According to its new strategy, the main objective of the corporation is to ensure that Russia has a technological advantage in highly competitive markets. The corporation plans to invest a total of RUB 4.3 trillion in development through 2025.
