## 83t60-RSE

### Mission

The 83t60-RSE system of regional tactical data exchange is intended for distributing and disseminating combat management information with the help of Forces, Armies; and for information interaction of regional network users of the naval command control system.

### Composition

#### Group of planning and communication management:

- planning of readiness and application of system, networks, communication facilities and data exchange;
- control of system, networks, communication facilities and data exchange;
- control of forming, distributing and inputting key data;
- control of all system elements functioning;
- protection of data, programs and means.

#### Server of data transmission (fail-safe):

- exchange of all types of information via conventional channels and network paths of wire (fiber-optical) communications and radio networks;
- providing managerial and engineering interface and information interface to the operational, operating and command centres;
- providing interface with data transmissions equipment;
- providing gateway switching of the information;
- providing universal addressing of subscribers;
- unitization of data links in a uniform track for increasing the network capacity and reliability of user's and gateway bindings;
- messages storing for the subscribers connected via channels of the switched telephone network, and their delivery to the subscriber at connecting to it;
- storing of especially important formalized messages in databases for the purpose of subscribers' information restoration;
- protection of data, programs and means.

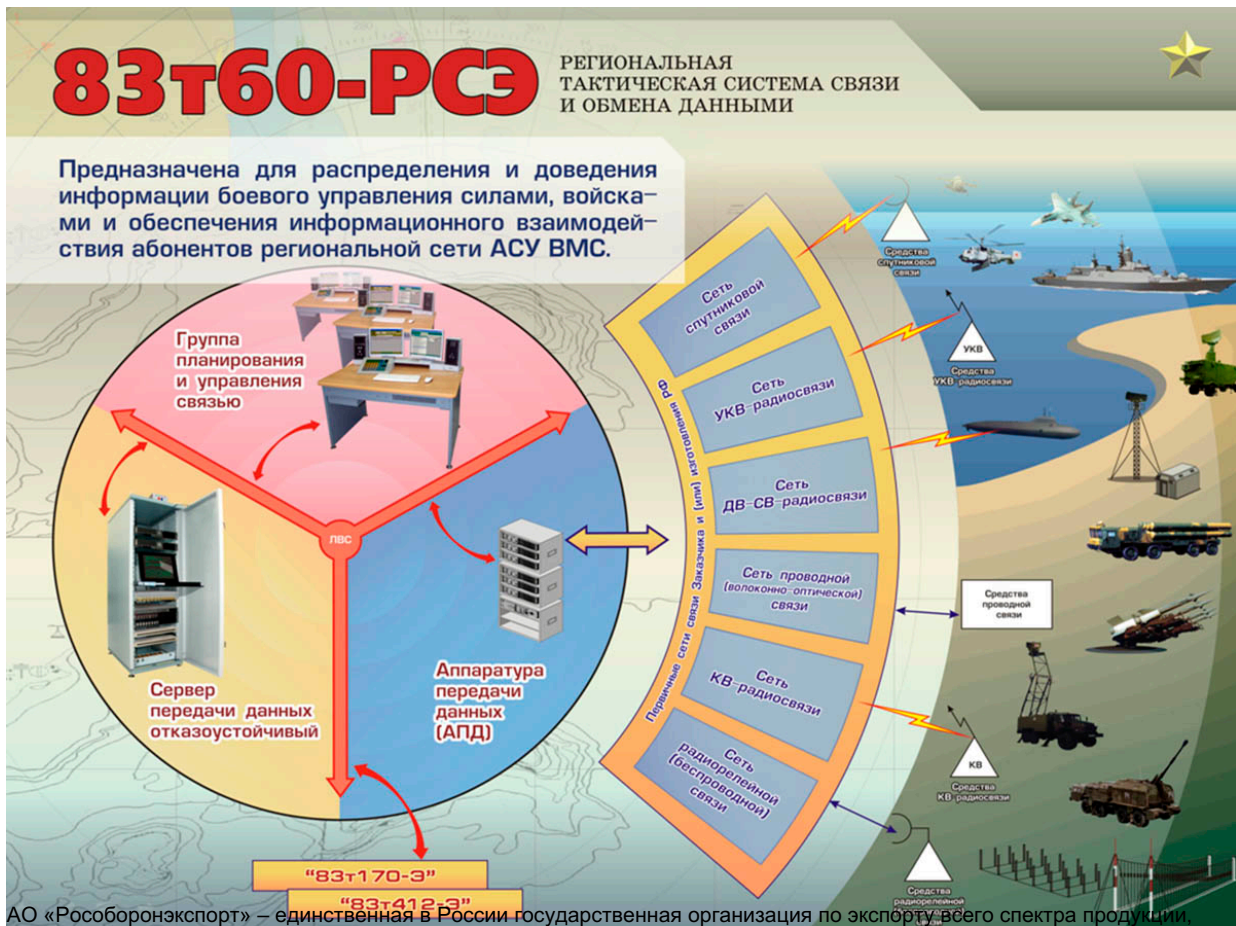

#### Data Transmission Equipment (DTE):

- interfacing with conventional channels and network paths of satellite, wire (fiber-optical), radio relay, short-wave and ultra-short wave radio communications;
- interfacing with automatic telephone exchange of Public Switched Telephone Network;
- cryptoprotection and false data entry prevention of transferred and received data;
- protection of the information against errors in communication channels;

- dynamic and static routing of data packages taking into account priority rank and importance category, and also connectivity of elements in System of Regional Tactical Communication and Data Exchange.

Características básicas:

АО «Рособоронэкспорт» – единственная в России государственная организация по экспорту всего спектра продукции, услуг и технологий военного и двойного назначения. Входит в Госкорпорацию Ростех. «Рособоронэкспорт» образован 4 ноября 2000 года и является одним из лидеров мирового рынка вооружений. На долю компании приходится более 85% экспорта российских вооружения и военной техники. «Рособоронэкспорт» взаимодействует с более чем 700 предприятиями и организациями оборонно-промышленного комплекса России. География военно-технического сотрудничества России – более 70 стран.
