

The opening ceremony of the helicopter training center took place in Venezuela

The opening ceremony of the helicopter training center, established with the assistance of Russian and Venezuelan specialists, took place on 29 March 2019.

Venezuela has been Russia's largest partner in military-technical cooperation in Latin America since 2005. A significant quantity of Russian weapons and military equipment, including the Su-30MK2 multirole fighters, Mi-brand attack and transport helicopters, tanks, infantry fighting vehicles, tube, rocket and missile artillery ordnance, advanced air defense systems and Kalashnikov AK-100 series assault rifles, were delivered to the country. This enabled the country to quickly acquire sufficient capacity to reliably ensure national security and defense capability.

The state-of-the-art helicopter training center was built under a contract between Rosoboronexport (part of the Rostec State Corporation) and CAVIM (Venezuelan Company of Military Industries), a Venezuelan state-owned firearms manufacturer.

Upon arrangement of the parties, the Venezuelan flight and maintenance personnel underwent training in the Russian Federation to operate the Center while Russian training simulators (both motion- and fixed-base), various equipment for classrooms, simulator control centers, etc. were supplied as well as the appropriate starting-up and adjustment works were under way.

The capabilities of the Center enable Venezuelan pilots to undergo comprehensive training in the operation and use of Mi-17V-5, Mi-35M and Mi-26T helicopters in conditions as close to reality as possible through modeling various abnormal situations that may arise in flight. Training at such a Center significantly shortens the flight training period for pilots and considerably saves costs for their training in general.

Rosoboronexport and other Russian organizations, involved in Russian-Venezuelan military-technical cooperation, remain committed to deepening cooperation with the Ministry of Defense and other government agencies of Venezuela, paying special attention to training, as well as timely maintenance of the delivered equipment.

Today, the helicopters delivered to Venezuela from Russia not only participate in routine military activities and operations against smugglers, but also successfully cope with aerial reconnaissance of forest fires, rescue and evacuation activities in the regions affected by natural disasters, as well as with the delivery of humanitarian goods (food and property).

[Rosoboronexport](#) is the only state-owned arms trade company in the Russian Federation authorized to export the full range of military and dual-purpose products, technologies and services. It is a subsidiary of the Rostec Corporation. Founded on 4 November, 2000, now Rosoboronexport is one of the leading world arms exporters to the international market. Its share in Russia's military exports exceeds 85 percent. Rosoboronexport cooperates

with more than 700 enterprises and organizations in the Russian defence industrial complex. Russia maintains military technical cooperation with more than 100 countries around the world.

Rostec is a Russian State Corporation that was established in 2007 to facilitate the development, production and export of high-tech industrial products designed for civilian and military applications. The Corporation comprises over 700 organizations in 60 constituent entities of the Russian Federation that are currently part of 15 holding companies and 80 directly managed organizations specializing in manufacturing military-industrial, civilian and dual-purpose products. Rostec's portfolio includes well-known brands such as AVTOVAZ, KAMAZ, Concern Kalashnikov, Russian Helicopters, UralVagonZavod, etc. In 2017 the consolidated revenue of Rostec reached 1 trillion 589 million rubles, while the consolidated net income and EBITDA amounted to 121 and 305 billion rubles respectively. According to Rostec strategy, the main objective of the Corporation is to ensure that Russia has a technological advantage in highly competitive global markets. Rostec's key objectives include the introduction of a new techno-economic paradigm and digitalization of Russian economy.
