

"Pantsir-S1M"

Effective destruction of any air targets

The latest mobile, multi-channel air defense system "Pantsir-S1M" features high firing capabilities, combining all the advantages of the system of the previous modification.

The Pantsir-S1M AAMGS is distinguished by a number of improved tactical and technical capabilities, including the increased range and altitude of engaged air targets. It is capable of using two types of 57E6M-E and 57E6-E SAMs (integrated into the Pantsir-S1 air defense system).

"Pantsir-S1M" anti-aircraft missile and gun system is designed for air defense of small military and administrative-industrial facilities and areas (including mobile ones) against fixed- and rotary-winged aircraft, cruise and short-range missiles, and precision munitions as well as for strengthening air defense units against massive air attacks.

Find out more about "Pantsir-S1M" AAMGS. tel.+7(495) 534 61 83

Main characteristics:

- Firing distance to the airplane with radar cross-section area of 2,5 sq. m and target speed of 300 m/s:
 - By missile armament:
 - range : 1200-30000 m
 - altitude : 15-18000 m
 - By gun:
 - range: 200-4000 m
 - altitude : 0-3000 m
- Number of simultaneously engaged targets : 4
- The maximum speed of engaged targets : 1000 m/s
