## "Tor-M2E" ("Tor-M2K", "Tor-M2KM")

### Each missile hits the target

Short-range mobile multi-channel ADMS with high probability of air targets engagement.

The air defence missile system has the following modifications:

- ▶ "Tor-M2E" - on the tracked base chassis;
- ▶ "Tor-M2K" - on a wheeled base chassis;
- ▶ "Tor-M2KM" - in a modular design.

ADMS has high firepower, noise immunity, short time for putting into combat readiness and the possibility of autonomous use of a combat unit.

"Tor-M2E" ("Tor-M2K", "Tor-M2KM") air defence missile system is designed to engage fixed- and rotary-winged aircraft, aerodynamic unmanned aerial vehicles, guided missiles, and other elements of high-precision weapons at medium, low and extremely low altitudes in contested air and jamming environment.

Find out more about "Tor-M2E" ("Tor-M2K", "Tor-M2KM") ADMS.  
tel.+7(495) 534 61 83

#### Main characteristics:

- Air targets engagement zone:
  - range: 1000-15000 m
  - altitude: 10-10000 m
  - course : up to 8000 m
- Quantity of simultaneously engaged targets: 4
