
"Gibka-S"

Mobility. Accuracy. Universality.

High mobility, implementation of the "fire-and-forget" principle, stealth combat application, and high noise immunity.

The combat vehicle of the MANPADS is capable of firing "Igla-S" or "Verba" MANPADS, in motion. It provides high automation of combat operation and round-the-clock combat application.

"Gibka-S" combat vehicle for MANPADS squad is designed for:

- ▶ air defence of combined armed units in all types of combat operations, including on march;
- ▶ protection of small-sized and military, industrial, and infrastructure facilities against cruise missiles and other means of air attack flying at low and extremely low altitudes;
- ▶ transportation of MANPADS squad personnel with their standard weapons, command and control systems, and other property in an armored vehicle.

Find out more about "Gibka-S" CV for MANPADS squad.
tel.+7(495) 534 61 83
