

"Verba"

Easy-to-use. Efficient. High jamming-protection.

Unique MANPADS with high protection against modern types of interference and the implementation of the "shoot-and-forget" principle.

"Verba" MANPADS is the latest Russian MANPADS with enhanced capabilities when firing at targets with low levels of thermal radiation and a reduced consumption of missiles when destroying various targets.

"Verba" man-portable air defense system is designed to defeat visible fixed- and rotary-winged aircraft, unmanned aerial vehicles, and cruise missiles on head-on and in pursuit courses under intensive optical interference.

Main characteristics:

- Range : 500 to 6000 m
- Altitude : 10 to 3500 m
- Target speed:
 - on head-on course : up to 400 m/s
 - on pursuit course : up to 320 m/s
- Ready for operation on a signal while on the march : 12 seconds
- Ready for launch after activation : 5 seconds
- Missile features tracing, passive, infrared three-spectral seeker:
