## Project 11711E

### Capable of anything

#### Workhorse of the Amphibious Forces

- ▶ Perfect seaworthiness;
- ▶ Multifunctionality;
- ▶ Well-mastered shipbuilding technologies;
- ▶ Different ways of troops disembarkation;
- ▶ Substantial troops capacity;
- ▶ Comfortable living conditions of the crew and troops.

The ship is capable of disembarking landing troops and vehicles by water using shipborne amphibious means or a pontoon raft. Disembarkation directly to the coast is also available.

A shipborne helicopter or high-speed motor boats are used to deliver military personnel.

Except for amphibious missions project 11711 can lift and disembark various cargo to an unprepared coast, ensures temporary deployment of amphibious systems of Landing and Special Forces.

#### Armament

Two AK-630M 1x6 30 mm or AK-630M2 2x6 30 mm artillery gun mounts:  
Range of fire, km – 15,7;

Pozitiv – ME 1.2 3D radar:  
Air target detection range, km – 150;

MR-123-02 Bagira fire control radar;

A hangar and a helipad for a 12 t helicopter;

Equipment to locate three high-speed motor boats.

Simple and reliable amphibious ship carries out various tasks in time of piece and in time of war.

Main characteristics:

- Full displacement, t : 6600
- Main dimensions (length, beam, draft), m : 135x16,5 x 3,8
- Maximum speed, kts.: 18
- Range, miles: 3500
- Endurance, days : 30
- Seaworthiness, points : 9
- Troops/cargo capacity, un.:
  - Tanks : 13
  - APCs : 36
  - Trucks : 40
  - Personnel : 300
