

Rubez-ME

One – vehicle army

Missile ship on wheels

- ▶ Substantial fire power;
- ▶ Compact;
- ▶ Possibility to have various configuration and composition;
- ▶ Mobile;
- ▶ Substantial maneuverability;
- ▶ Grate survivability, coyness and resistance to countermeasures.

Target designation and combat systems are installed on one platform so that Rubez – ME can be used either as a single combat unit or as a group of up to 8 vehicles.

Thanks to the composition of the system, current tactical situation and assigned combat task, various configurations of armament and technical equipment with flexible fire control can be formed.

Rubez – ME coastal defence system can effectively combat against surface ships in littoral areas using minimized composition of armament and technical means.

Main characteristics:

- Mass of the launcher unit, t: 26
- Maximum speed, km/h : 75
- Crew, men : 2
- Range of fire, km : 260
- Ammunition load, missiles : 4
- Missile's speed, M : 0,85
- Target detection range:
 - by an active radar, km: up to 100
 - by a passive radar, km : up to 450
