

## Anker-4E

**Compact. Light. Safe.**

High-sensitive detector applicable in places where use of active radio-electronic equipment is prohibited.

Anker-4E is a passive multi-sensor inspecting device, which detects various timing devices: mechanical, electromechanical, electronic, as well as other electronic devices and gears by their electric, magnetic, acoustic and vibrating emissions.

Anker-4E helps in inspecting aircrafts, various suspicious objects, as well as in searching for people hidden in shelters.

Anker-4E can detect:

- ▶ electromechanical timing devices at the range of up to 40 cm;
- ▶ electronic timing devices at the range of up to 10 cm;
- ▶ radio signal receivers at the range of up to 15 cm.

Main characteristics:

- Power supply: 4 AA elements
- Time of operation using one set of power elements, h: at least 30
- Operating temperatures, °C: +5 ... +40
- Dimensions (length / diameter), mm: 510 / 34
- Weight (in operating state / in standard case), kg: 0.65 / 2.4
