

SVD

Every Soldier is a Marksman

The Dragunov Sniper Rifle is a proper weapon for infantry and other units to engage manpower, both protected and not, and other targets on the battlefield within wider range of distances with high accuracy.

SVD is a reliable gas-operated sniper rifle designed to engage different types of targets within the range of 1200m using the whole list of 7.62x54mm ammunition (including AP Incendiary, AP, tracer bullets etc).

The rifle is easy to use, maintain and repair, which can be vital for regular troops. Marksmen can adjust and equip the sniper rifle with various sighting systems (both day/night) depending on the tasks and combat environment. Modern theatre of action promotes the demand for this type of small arms.

SVD has been battle tested all over the world which makes it undoubtedly reliable and efficient.

Main characteristics:

- Caliber: 7.62mm
- Ammunition: 7.62x54mm
- Empty weight (with optics): 4.3 kg
- Sighting range:
 - with optics: 1300 m
 - w/o optics: 1200 m
- Magazine: 10 rounds
