

SVDS

High Accuracy in Compact Design

The Dragunov Sniper Rifle with a folding buttstock is a proper weapon for engaging manpower and other targets with high accuracy, while making the operator more maneuverable and airborne.

SVDS is a reliable gas-operated sniper rifle designed to engage different types of targets within the range of 1200m using the whole list of 7.62x54mm ammunition (including AP Incendiary, AP, tracer-bullets etc).

The rifle is easy to use, maintain and repair, which can be vital for regular troops. Marksmen can adjust and equip the sniper rifle with various sighting systems (both day/night) depending on the tasks and combat environment. Modern theatre of action promotes the demand for this type of small arms. SVDS has been battle tested all over the world which makes it undoubtedly reliable and efficient.

Folding buttstock makes it especially popular with airborne, marine and other rapid-deployment units.

Main characteristics:

- Caliber: 7.62mm
- Ammunition : 7.62x54mm
- Empty weight (with optics): 4.7 kg
- Sighting range: 1200 m
- Magazine: 10 rounds
