

Project 21820E Dygon

Universal and high-speed

Fast delivery – careful disembarkation

- ▶ High speed;
- ▶ Spacious landing compartment;
- ▶ Comfortable conditions for the crew and troops;
- ▶ Unique propulsion plant;
- ▶ Extended two-section bow ramp.

The boat is designed for high-speed transportation of troops, cargo and combat vehicles. Disembarkation to an unprepared coast is available. The cargo can be delivered to poorly accessible areas of the coast.

Two-section bow ramp significantly simplifies the disembarkation of the military vehicles to the coast.

Air cavity cushion decreasing the water resistance is created by two centrifugal blowers with gears situated at the ship's bottom.

Ventilated water-jets ensure high-speed and perfect maneuverability.

Armament

MPTU 14.5 mm shipborne pedestal machinegun.

In time of war Dygon ensures fast disembarkation of troops with organic vehicles on the shore under enemy's active countermeasures. In time of peace the ship is capable of delivering cargo and passengers.

Main characteristics:

- Full displacement, t : 305
- Main dimensions (length, beam, draft), m : 45x8,5x1,9
- Maximum speed, kts. : 35
- Range, miles : 500
- Endurance, days : 1
- Seaworthiness, points : 5
- Landing compartment capacity, un.:
 - tanks : 2
 - APCs : 4

- trucks : 4
- troops, men : 200
