## AK-176 MA-01

### Shot-to-kill. No misfires.

#### New horizons for the well-tested system

- ▶ Universal;
- ▶ Reliable;
- ▶ High rate of fire;
  - ▶ Highly accurate;
  - ▶ Substantial fire power;
- ▶ Unmanned combat compartment.

AK-176 MA-01 represents further development of the well-established AK-176M artillery gun mount. The production technology of AK-176 MA-01 has been well-mastered over the years of AK-176M manufacturing. As the result high reliability is ensured.

Artillery gun mount is designed for surface-ships and boats. Fast change of feeding belts (with different types of rounds) is the distinguishing advantage of the system. Thanks to this feature the system can rapidly switch between engaging surface and aerial targets. Stealth technologies are used in production of the gun turret.

AK-176 MA-01 is the reliable shipborne artillery gun mount comprising time-tested technologies and modern advancements.

#### Main characteristics:

- Full mass, t : 9
- Ammunition load, un.: 152
- Range of fire, vertical/horizontal, km : 11,6 /15,7
- Rate of fire, rpm : 125±12
- Guidance angles azimuth/elevation, deg. : from -15° .... +85°
- Guidance speed elevation/azimuth, deg./sec. : 35/60
- Types of rounds: :
  - AA HE fragmentation shell with radio-fuse:
  - HE fragmentation shell with impact fuse:
