

## BSK-S

**Covert. Multifunctional. Reliable.**

Unattended Ground Sensors for any Application. Concealed and Field Proven.

- ▶ Early warning;
- ▶ On-the-fly deployment;
- ▶ Concealed intruder detection;
- ▶ Standalone operation;
- ▶ Wireless alarm transmission.

A buried sensor recognizing footsteps or vehicle movement within its detection zone. A reliable tool to define the type of intruder ("single", "group", "vehicle") and target movement direction. BSK-S transmits alarm wirelessly to Central Control Panel (CCP) and Portable Control Panel (PCP).

Main characteristics:

- Operation time on fully charged battery, days: 540
- Detection zone length, m: Radius/classification: Person - 50 Group - 35 Vehicle – 100
- Supply voltage, V: 6,0...11,0
- Operating temperature range, °C: -40...50
- Maximum data transmission range, m: 500
- Operating frequency, Hz: 0,433
