

Pantsir-ME

Repel any attack

Unbreakable Air Defence

- ▶ highly effective combination of armament;
- ▶ automated, multichannel, highly-accurate fire control system;
- ▶ short time of response;
- ▶ substantial missile load;
- ▶ high jamming immunity;
- ▶ automation of combat processes.

Pantsir-ME consists of control and combat modules, storage and feeding systems. Main armament: two 30-mm artillery machine-guns, rails for 8 TLCs with missiles, a power drive and a radar-optical control system.

The system can effectively repel missile strikes from different directions and simultaneously engage 4 targets. Pantsir-ME ensures reliable protection from high-precision missile salvos (including anti-ship missiles and UAVs), and from attacks of small vessels and boats.

Main characteristics:

- Engagement zone:
 - elevation artillery/missiles, m : 0...3000/ 2...15000
 - range artillery/missiles, m : 500...4000/ 1500...20000
 - Artillery rate of fire, rpm : 10000
 - Number of channels to engage targets : 4
 - Max speed of a target, m/s : 1000
 - Ammunition load missiles / rounds, un. : 32/1000
 - Time of response, s : 3...5
 - Weight with ammunition load , kg 7100: 7100
