

Rosoboronexport to Expand Cooperation with Foreign Private Customers on Security Equipment

JSC Rosoboronexport (part of Rostec State Corporation) is taking part in the XXIV International Exhibition of Means of State Security Provision Interpolitex-2020, which is to be held on October 20-23 in pavilion 57 of VDNH in Moscow.

Rosoboronexport will use the Interpolitex-2020 forum for carrying out an active marketing work on the promotion of a wide spectrum of civilian and dual use products in the area of security provision.

“Rosoboronexport continues to explore the world market of high-tech civilian and non-military products. Law-enforcement agencies, anti-terrorist and other special services of the majority of our partners are actively using and rating high separate products and complex solutions, designed for the provision of security, which are developed and produced in Russia. In the context of diversification of production of the country’s defence industry enterprises and the increase in their output of civilian products, we are expanding cooperation with foreign private commercial organizations and stand ready to offer them the full range of professional equipment, which is widely represented at Interpolitex,” said Rosoboronexport’s Director General Alexander Mikheev, who also holds position of Deputy Chairman in the Russian Engineering Union.

Interpolitex-2020 represents exclusively civilian and dual use products. Rosoboronexport’s exhibit, in particular, demonstrates electroshock devices, made by the March Group LTD, to include “[Cerberus](#)”, a unique electroshock device with a metal detector capability and the “[Skala](#)” electric shield. There are also means of armor protection, offered by the NII STALI JSC, i.e. a blast suppression blanket and the “Elbrus-T” ballistic helmet, which is an all-new product. The exhibit includes as well thermal sights of the Research and Production Company Infratech LTD, body armors of the Mamadysh Integrated Plant, the [PB-4SP OSA](#) non-lethal pistol of the Federal Research and Production Center “Scientific Research Institute of Applied Chemistry” (part of Rostec State Corporation) and a series of nonlinear junction detectors, produced by JSC JUTTA Protection Group, which were tested in real-world operations.

Besides, part of Rosoboronexport’s exhibit will be taken by “Lobaev Arms” rifles, designed and produced by KBIS LTD. The visitors will see the [TSVL-8 Stalingrad](#) tactical sniper rifle, the [DVL-10 M1 Diversant](#) tactical modular rifle, as well a completely new product of the worldwide renowned brand name, i.e. the DVL-10 M3 Volkodav tactical modular rifle in a short and light version with the weight of 4.5 kg and barrel length of 500 mm.

On October 21, for the first time ever throughout the history of Interpolitex exhibitions, Rosoboronexport will hold a presentation of security equipment with a live streaming, which will start at 10:00 in Russian and at 11:00 in the English language. The broadcasting will be available on the company’s website www.roe.ru, Rosoboronexport’s [youtube-channel](#), and at the links http://провести-трансляцию.pdf/roe/security_rus/ (Russian version) and

https://vendlab.ru/roe/security_eng/ (English version). The presentation will demonstrate state-of-the-art pieces of equipment, exported by the company, including inspection systems, produced by the Scantronic Systems LTD (part of Rostec State Corporation).

“Rosoboronexport considers cooperation with various private security companies, transport and infrastructure security services and IT companies as one of the drivers of the expansion of nomenclature and geography of cross border sales of Russia’s high-tech products. Solutions, which we offer, are successfully used by the Russian special and police agencies, and have good references among representatives of law-enforcement agencies in foreign countries,” added Alexander Mikheev.
