

## Yak-152

### The best choice for initial training

The aircraft provides honest selection and effective training of pilot cadets as well as high safety of flight. The only aircraft in its class that is equipped with the emergency escape system.

The Yak-152 Primary training aircraft provides professional selection among aviation cadets, primary flight training and professional guidance of future military aviation pilots.

The Yak-152 is capable to perform training flights in normal and harsh weather conditions, day-and-night, moreover it has a deployment on the unpaved airfields capability. The information and control field of the Yak-152 is fully unified with cabins of the Yak-130 combat trainer jet.
