

IHIE-2021

The International Helicopter Industry Exhibition (IHIE) HeliRussia is held annually at Moscow's Crocus Expo international exhibition centre (IEC). The Ministry of Industry and Trade of the Russian Federation acts as the organizer. In 2021, the IHIE will be held on May 20-22.

Rosoboronexport traditionally takes part in this exhibition.

The exhibition facilitates exchanges between domestic and foreign developers and manufacturers of helicopters, specialized equipment, control systems, navigation and communication assets. Traditionally, IHIE is not only a place for demonstrating achievements of the global helicopter industry, but also for discussing topical industry and cross-industry challenges.

The exhibition presents global achievements on the entire range of products and services of the helicopter industry - from design and manufacturing to operation, maintenance and modernization. In addition, a demonstration of navigation equipment and radar monitoring equipment is envisaged.
