

Linza

Medical Assistance anywhere anytime

The Linza field ambulance is a highly-protected armoured vehicle with outstanding cross-country performance

The Linza protected field ambulance is designed for search, collection and evacuation of the wounded from the battlefield, centers of mass casualties and man-made disasters. It enables provision of first aid in emergency situations during transportation, and at the same time ensures the declared level of ballistic and mine protection.

The field ambulance can also be used to transport medical equipment and for deployment of a battalion medical station.

Main characteristics:

- Wheel arrangement: 4x4
- Base chassis: armoured vehicle Typhoon-K (K-53949)
- Curb weight, kg:
 - ZSA-T: 15,210
 - ZSA-P: 15,500
- Payload capacity, kg:
 - ZSA-T: 1,080
 - ZSA-P: 1,060
- Crew:
 - ZSA-T: 3
 - ZSA-P: 5
- Number of seats for transportation of wounded (sick), lying/seating patients:
 - ZSA-T: 4/6
 - ZSA-P: 2/3
- Engine: KAMAZ-610.10-350
- Engine power, kW (hp), at least: 257 (350)
- Maximum speed, km/h, at least: 105
- Cruising range, km, at least: 1,000
- Negotiated obstacles:
 - Ascend, deg.: 30
 - Forging depth, m, at least: w/o preparation / w preparation: 1.5 / 1.7
 - Ditch width, m, at least: 0.5
 - Vertical step, m, at least: 0.6

- Transmission: mechanical 9-speed
- Suspension type: independent, spring-type
- Tires: 14.00 R20
