

## Rosoboronexport: arms export contracts worth over 3 billion euros were signed at exhibitions held in Russia this summer

The summer exhibition period 2021 has demonstrated strong demand for Russian weapons and military equipment. At the ARMY-2021 Military-Technical Forum, MAKS-2021 Air Show and IMDS-2021 Maritime Defense Show, Rosoboronexport (part of the Rostec State Corporation) held negotiations with foreign partners and signed over 30 contract documents worth over 3 billion euros.

Rosoboronexport has leveraged the full potential of Russian summer defense exhibitions, thereby replenishing its order portfolio and increasing the workload of the domestic defense enterprises: the export plan now includes [Su-30-type](#) aircraft, [Mi-35M/P](#), [Mi-171Sh](#) and [Mi-17V-5](#) helicopters, aircraft weapons, [Pantsir-S1/S1M](#) self-propelled anti-aircraft gun/missile (SPAAGM) system, [Verba](#) MANPADS, Protivnik-GE radar, Krasukha electronic warfare system, Repellent-Patrol mobile anti-drone EW system, [Kornet-EM](#) ATGM system, remote controlled weapon stations, weapons for surface combatants and submarines, small arms, ammunition. An agreement was reached on integrating Russia's Palma shipborne gun/missile close-in weapon system (CIWS) into a ship's foreign-made weapons system.

"Russia's successes in military-technical cooperation prove that the domestic industry is capable of developing new unique products and solutions that are in demand in the market. At the same time, a qualitative renewal of the plants and design bureaus' fixed assets, their timely retrofitting and upgrading at the expense of funds received from the implementation of state defense orders and export contracts, launches the processes of positive transformation of infrastructure in regions, from household facilities to science schools, technology parks and experimental laboratories accessible to youth," said Alexander Mikheev, Deputy Chairman of the Russian Engineering Union (REU), Director General of Rosoboronexport.

Among new Russian products presented at Russian exhibitions this summer, foreign partners paid special attention to the T-14 Armata tank, combat vehicles based on the Boomerang platform, Orion-E reconnaissance/strike UAV, Antey-4000 battlefield air defense missile system, [Pantsir-S1M](#) SPAAGM system, the fifth-generation [Su-57](#) fighter, [BMP-3](#) with the Berezhok combat module, other equipment. More than 80% of Rosoboronexport's annual deliveries fall on products manufactured at REU's enterprises: Rostec's holding companies, including Russian Helicopters, High-Precision Systems, United Aircraft Corporation, and other domestic defense enterprises.

"The enterprises associated in the Russian Engineering Union are a strong growth driver of the Russian economy, which greatly contributes to the development of military-technical cooperation: their high-tech products are heavily exploited by partners from more than 100 countries, in the most challenging climatic and combat conditions," said Alexander Mikheev.

Systemic cooperation with REU enterprises is carried out in all regions of the country, enabling Rosoboronexport to continuously replenish its "library of offset projects" aimed to promptly

engage domestic enterprises in drawing up tender bids for foreign buyers.

Today, Rosoboronexport's portfolio of export orders exceeds \$52 billion.

Reference. Alexander Mikheev holds the position of Deputy Chairman of the Russian Engineering Union (RUE), personally oversees the Saratov and Yaroslavl regional branches of the organization, and also heads the Committee for the Development of Foreign Trade Activity in Relation to Defense Products. The Russian Engineering Union is an influential all-Russian public organization. It is based on regional offices that are active in 72 constituent entities of the Russian Federation. Over 600 local branches have been established. RUE includes almost all the major enterprises and organizations of mechanical engineering and related industries. Sergey Chemezov, CEO of Rostec State Corporation, is the Chairman of the Russian Engineering Union.
