

## Titan

### Suits various small arms of regular and large caliber

Ensures observation, target detection and identification, medium and long-range precise shooting with detection range up to 1700 m.

Professional grade thermal clip-on designed to detect and recognize targets at maximum distances, as well as to conduct targeted firing from large-caliber weapons. Tital is installed in front of the day riflescope and turns it into a professional thermal-imaging sighting system while preserving the mean point of impact.

#### Main characteristics:

- Sensor resolution: 640x480
- Screen refresh rate, Hz: 25
- Focus of the lens, mm: 100; f/1.4
- Optical magnification: 1.0
- Digital Zoom: x2, x4, x8
- Field of view, deg: 6.2 x 4.6
- Dimensions, mm: 223x97x115
- Weight, g: 755
