

DHF 4-28x56 Harrier

Intelligent riflescope for precise long-range shooting and mounting hunting

Creates digital environment to deliver immediate calculation of the angle of sight thus allowing to perform the most precise shot.

This superb intelligent riflescope is designated for precise long-range shooting and mounting hunting. Wireless communication link provides fast and convenient data transfer from the Strelok Pro mobile app. Built-in sensors measure inclination and cant angles, ambient temperature, and atmospheric pressure. This digital environment delivers immediate calculation of the angle of sight thus allowing to perform the most precise shot.

Main characteristics:

- Magnification: 4-28×
- Angular Field of View, m/100m (degrees): 8.7 - 1.4 (5 - 0.8)
- Objective Lens Clear Aperture, mm: 56
- Power Source: One AA battery
- Battery Lifetime, hours: 50 - 500
- Dimensions, (L×W×H), mm: 411×92×88
- Weight, kg: 1.07
