

Raptor Tactical

Individual approach to each sniper

The Raptor Tactical sniper complex was developed in collaboration with specialists from the Russian University of Special Forces. The initial goal is maximum accuracy at long and ultra-long distances.

- ▶ Personalized complex;
- ▶ One of the best accuracy rates in the world;
- ▶ Ultra-durable, reliable materials.

The rifle is produced in the most common sniper calibers: .338 Lapua Mangum, .300 Winchester Magnum, .300 Norma Magnum and .300 PRC.

The barrel is made from 416R stainless steel and can range in length from 26 to 28 inches. The 6-groove barrel can be equipped with a CNC suppressor which has proven its effectiveness in combat conditions.

The main advantage of the complex is that each component, right down to the cartridge, is produced personally for a specific sniper.

Main characteristics:

- Barrel length, mm: 660-711
- Cartridge: .338 Lapua Mangum, .300 Winchester Magnum, .300 Norma Magnum, .300 PRC.
- Weight, kg: 7
- Magazine capacity, cartridges: 5
- Accuracy: 0.1 MOA
- Effective range, m: 1500
- Shoulderstock: Folding, adjustable
- Mountings: Picatinny rails for bipod, day sight, clip-on and sling mounts
