

ROSOBORONEXPORT to Present Russian Products at the International Exhibition "Integrated Security - Securex Uzbekistan 2024" for the First Time

JSC ROSOBORONEXPORT (part of Rostec State Corporation) will showcase the most recent products of Russian defence enterprises and advanced security solutions at the 15th Anniversary International Exhibition "Integrated Security - Securex Uzbekistan 2024." Uzbekistan's largest trade fair in the field of general security and fire safety will be held from November 5 to 7, 2024 at Uzexpocentre, a national exhibition complex in Tashkent. "The partnership between Russia and Uzbekistan is strategic in nature, it promotes stability and peace in the Central Asian region," - said Alexander Mikheev, Director General of ROSOBORONEXPORT. - "We are ready to assist Uzbekistan's security agencies in upholding public and state security and are pleased to cooperate in this area. Taking part in the Securex Uzbekistan trade fair for the first time, ROSOBORONEXPORT will exhibit Russia's latest products for the military, special and police units. The hardware and digital solutions we are putting on display can counter all modern security threats and challenges," he added. Visitors to the ROSOBORONEXPORT booth will be able to see cutting-edge Russian solutions in four segments: weapons and equipment for ground forces and special units; civilian small arms and non-lethal systems for law enforcement agencies; special-purpose technical equipment for law enforcement agencies; digital solutions. Among other pieces of weaponry, the company will present AK-100 and AK-200 series of Kalashnikov assault rifles, the AK-15 and AK-19 short-barreled rifles, the Lebedev pistol, the PPK-20 and PP-2000 submachine guns, the Chukavin and VSSM sniper rifles, the large-caliber VKS and OSV-96 sniper rifles. Furthermore, ROSOBORONEXPORT will be offering a range of optical devices, which increase efficacy of small arms and are suited for various tasks: collimator sights, daylight, thermal and night sights, including pre-objective attachments. As a means of individual protection for military servicemen and special forces personnel, a set of combat equipment "Strelok" will be presented, consisting of a bulletproof vest with a weight distribution system, additional ballistic protective modules and a set of pouches. "Strelok" will be demonstrated as part of a third-generation all-weather field uniform kit (VKPO 3.0). Law enforcement agencies and security units could be interested in non-lethal means: electric shockers of various types with a range of up to 4.5 m, a magazine grenade launcher that can be used with 7 types of ammunition, including smoke and flash-bang grenades, and thermobaric devices. ROSOBORONEXPORT will also display inspection equipment that helps ensure security at infrastructure facilities, on transport and in crowded places: stationary and portable identifiers, gas analyzers to detect prohibited substances, metal detectors and non-linear locators designed to search for and identify communications equipment, electronic devices for covert information collection and explosive devices. In the digital security segment ROSOBORONEXPORT will be showing Russian solutions for web monitoring, comprehensive information security, and the Smart City project. The company will offer means for transporting documents and for emergency destruction of information on magnetic and paper media, as well as a secure SSD drive with a built-in data destruction system. During the exhibition ROSOBORONEXPORT will hold meetings and talks with partners from Uzbekistan and other Central Asian countries. In addition to defence wares, experts will be able to examine solutions in the field of medicine, fire safety, disaster control, prevention and management.
