

SR3

The 9mm AM (SR3) small-size assault rifle is designed to destroy manpower, wearing individual means of protection, and soft vehicles at a range of up to 200 m. The assault rifle fires a special 9x39mm SP-5 or SP-6 cartridges. The SP-6 cartridge, fired from the AM, preserves its 100% killing power upon penetrating two 1.4 mm thick titanium plates and 30 kevlar layers of body armor at a range of 100 m. Special reduced-ricochet rounds make the weapon efficient for employment in confined space.

The weapon is fed by 10- or 20-round magazines standardized with those of the 9mm VSS special sniper rifle and the 9mm AS special assault rifle.

The collapsible metal butt folds up to the receiver cover.

Main characteristics:

- Caliber, mm: 9
- Cartridge: SP-5 or SP-6
- Effective range of fire, m: 200
- Muzzle velocity, m/s: 295
- Rate of fire, rds/min: 840
- Weight with empty 20-rd magazine, kg: 2,1
- Length, mm:
 - butt extended: 640
 - butt folded: 396
- Magazine capacity, rds: 10 or 20
