

RPK-203

Proper Fire Support

Light Machine Gun in 7.62mm with high fire density and long range of engagement will be a proper weapon for any defensive or offensive operation.

The 7.62mm RPK-203 Light Machine Gun was designed on the basis of highly reliable gas-operated Kalashnikov system, which provides all the benefits of time and battle tested solutions. The LMG is light enough for the operator to use it from any position and requires no time to be combat ready.

RPK-203 can considerably augment firepower of any unit and longer barrel lifespan provides the unit with consistent fire rate. Mobility of the operator in the field is provided by the folding buttstock and reasonable weight. The LMG is equipped with a bipod for better stability in automatic fire mode and higher accuracy in single fire mode. RPK-203 is a very balanced Machine Gun capable of suppressing enemy manpower and assets under any weather conditions.
