

Rosoboronexport to showcase latest Russian-made Air Force and Air Defense equipment at Dubai Airshow 2017

JSC Rosoboronexport (part of the Rostec State Corporation) will showcase the latest Russian-made Air Force and Air Defense equipment at Dubai Airshow 2017, which will be held from November 12 to 16 in Dubai, United Arab Emirates.

Dmitry Shugaev, Director of the Federal Service for Military-Technical Cooperation (FSMTC) of Russia, has been appointed as Head of the united Russian delegation. Rosoboronexport's delegation is headed by Sergei Kornev, Deputy CEO - Director of Air Force Equipment Export Department. Rosoboronexport CEO Alexander Mikheev and his deputy Sergei Goreslavsky will also take part in the Russian delegation's activities.

“The Middle East arms market is essential to us. The countries of the region traditionally equip their armies with the most advanced types of weapons and military equipment. It's no secret that they pay great attention to Russian air defense equipment, including the S-400 Triumf systems, which work flawlessly today in the neighboring Syria. We also see interest in the latest combat aircraft, for example, the Su-35 multipurpose super-maneuverable fighter jet, which this year will participate for the first time in the Dubai air show with its flight demo program,” said Sergei Kornev.

Rosoboronexport is the organizer of the single Russian exposition at Dubai Airshow 2017, whose total area in the exhibition pavilion will be about 700 square meters. In addition to Rostec and Rosoboronexport, eight leading Russian manufacturers of weapons and military equipment for the Air Force and Air Defense will display their products.

“Rosoboronexport considers its participation in Dubai Airshow 2017 as an extremely important marketing task. In recent years, the exhibition has turned into one of the key events of its kind. Along with such venues as MAKS (Russia), Paris Air Show (France), Farnborough International (United Kingdom) and Airshow China (China), it is among the top five largest aerospace shows in the world,” Sergei Kornev added.

At the exhibition, advanced Russian weapons will be demonstrated using the latest exhibition technologies developed by Rosoboronexport, including a holographic multimedia catalog and a demonstration table with levitating models. The interactive dashboards will allow the visitors to the company's exposition to get acquainted with weapons and military equipment, their performances, look at photographs of full-scale hardware, as well as see videos showing weapons in action.

Russia's partners in the region are expected to take a keen interest in the Ka-52 and Mi-28NE attack helicopters, Mi-171Sh military transport helicopter, Mi-35M transport/attack helicopter, Yak-130 training (combat training) aircraft, MiG-29M multifunctional front-line fighter, Su-35 multi-role super-maneuverable fighter.

Of air defense assets, it is expected that special attention will be paid to the S-400 Triumf air defense missile system, the Pantsir-S1 self-propelled air defense missile/gun system, the Buk SAM system, the Igla-S and Verba MANPADS, as well as radio electronic means.

The demonstrations of the Russkiye Vityazi (Russian Knights) aerobatics team, which invariably earn applause from the audience, wherever they perform, will be the highlight of the exhibition's program. In the sky over Dubai, for the first time in the framework of Dubai Airshow 2017, the Russian pilots will show "wonders" of aerobatics with the Su-30SM and Su-35 super maneuverable multifunctional fighters. In addition, it is planned that full-scale Su-35, Be-200 and Sukhoi Business Jet planes will be demonstrated in the outdoor display area.

Rosoboronexport is the only state-owned arms trade company in the Russian Federation authorized to export the full range of military and dual-purpose products, technologies and services. It is a subsidiary of the Rostec Corporation. Founded on 4 November, 2000, now Rosoboronexport is one of the leading world arms exporters to the international market. Its share in Russia's military exports exceeds 85 percent. Rosoboronexport cooperates with more than 700 enterprises and organizations in the Russian defence industrial complex. Russia maintains military technical cooperation with more than 70 countries around the world.

Rostec State Corporation is a Russian corporation that was established in 2007 to facilitate the development, production and export of high-tech industrial products designed for civilian and military applications. The Corporation comprises over 700 organizations that are currently part of 11 holding companies operating in the military-industrial complex and 3 holding companies working in civilian industry, as well as 80 directly managed organizations. Rostec's portfolio includes well-known brands such as AVTOVAZ, KAMAZ, Kalashnikov Concern, Russian Helicopters, VSMPO AVISMA, UralVagonZavod, etc. Rostec companies are located in 60 constituent entities of the Russian Federation and supply products to more than 70 countries. In 2016, the consolidated revenue of Rostec amounted to 1 trillion 266 billion rubles, while the consolidated net income and EBITDA amounted to 88 and 268 billion rubles respectively. In 2016, the average salary in the Corporation was 44,000 rubles. According to Rostec strategy, the main objective of the Corporation is to ensure that Russia has a technological advantage in highly competitive global markets. Rostec's key objectives include the introduction of a new techno-economic paradigm and the digitalization of the Russian economy.
