

## Project 22460

### Patrolling and protecting

#### Offshore aircraft-carrying ship with low displacement

- ▶ UAVs and a helicopter are located aboard the ship;
- ▶ A high-speed motor boat is placed on the stern slip;
- ▶ Substantial seaworthiness and endurance;
- ▶ Perfect habitability.

Aviation available onboard ensures distant monitoring of large sea-surface areas.

High-speed motor boats can efficiently intercept suspicious vessels.

Project 22460E is capable of continuous patrolling of the all State's EEZ without a port call.

#### Armament

AK-630M artillery gun mount 1x6 30 mm:

Range of fire, km – 5;

A helipad to locate a helicopter up to 12 t.

Slip and equipment for boats to locate high-speed motor boats.

Project 22460E will effectively ensure the compliance with the State's interests in the EEZ.

#### Main characteristics:

- Standard displacement, t: 600
- Main dimensions (length, beam, draft), m: 62,5x11,0x2,6
- Maximum speed/patrolling, kts.: 33/10
- Range, miles: 3500
- Endurance, days: 30
- Seaworthiness, points: 8
