

"Tor-E2"

Perfect defence of troops and objects

The latest mobile multi-channel short-range ADMS with a large ammunition load of surface-to-air missiles.

"Tor-E2" ADMS is the latest modification of the Tor-type ADMS, combining all the advantages of the previous modifications. It has a number of improved tactical and technical characteristics, including doubled ammunition load of the ADMS.

"Tor-E2" air defence missile system is designed to engage fixed- and rotary-winged aircraft; cruise, anti-radar, and other guided missiles; gliding and guided bombs, and unmanned aerial vehicles in contested optico-electronic and fire-intensive environment, in any meteorological conditions, day and night.

Find out more about "Tor-E2" ADMS. tel.+7(495) 534 61 83
