

Welcome speech of General Director of Rosoboronexport

Dear colleagues and friends!

On behalf of Rosoboronexport, I welcome and congratulate you on the opening of "Army-2020" - the sixth International Military-Technical Forum, that today gives to the world arms market a signal to start a full-fledged working mode.

Unfortunately, cross-border restrictions still prevent many of our friends and partners from visiting Russia and this event. We totally understand the situation and have expanded our participation in the "Army" thanks to the virtual space.

Especially for you, dear colleagues, we have prepared video reviews of the latest weapons and special equipment, including the Sukhoi-57E perspective multirole 5th generation and MiG-35 multirole 4th generation fighters, "Antey-4000" air defence system, SPRUT-SDM1 light floating tank in new modification, wheeled armored vehicle on the "Boomerang" platform, "Rubezh-ME" coastal defence missile system and many others.

The materials will be available on the official Rosoboronexport website (www.roe.ru), as well as on our YouTube channel and Facebook account.

We will also broadcast there all the important events of "Army-2020", dynamic demonstrations of military equipment, shooting and flight programs. Thanks to an exhibition video guide, everybody will have a chance to explore the exhibition from anywhere in the world.

I wish all real and virtual participants and guests of the forum a rich business program, contracts and agreements. We will meet in real life for sure. Rosoboronexport is glad to see you everytime!

Director General of Rosoboronexport
Alexander Mikheev

ROSOBORONEXPORT
