

ROSOBORONEXPORT presents Russian weapons at Army 2024 that are in demand in world market

ROSOBORONEXPORT JSC (part of Rostec State Corporation) is taking an active part in the 10th anniversary International Military-Technical Forum Army 2024, which will be held from August 12 to 14, 2024 at the Patriot Exhibition and Convention Center. The company's exhibit is based on the latest weapons and weapon systems developed by leading Russian defence manufacturers that are in demand among foreign partners. "At Army 2024, ROSOBORONEXPORT presents Russian products for the most relevant segments of the global arms market today. At the forum we use a cluster approach to exhibiting state-of-the-art weapons and military equipment that have proved effective in real combat conditions,"- said Alexander Mikheev, Director General of ROSOBORONEXPORT. "We are showcasing unmanned solutions for all domains of warfare, UAV countermeasures systems, precision guided weapons, artillery systems, armored vehicles and air defence assets at our venues and in Russian leading manufacturers' exhibits. We are expecting high interest from the customers in the systems designed to protect facilities, equipment and personnel from a variety of threats, including unmanned ones, that have been modified in light of combat experience". At Army 2024 ROSOBORONEXPORT plans to present 700+ military, dual-use and civilian products to foreign partners. Many of them are being exhibited for the first time. Among them are the Lancet-E loitering munition system with two different guided munition carriers, SPTP2S25M (Sprut) upgraded light amphibious tank, MGTT-LB robotic multipurpose tracked transporter/tractor, Plastun universal transport platform, Spartak and Tigr-M SpN wheeled armored vehicles equipped with unmanned aerial vehicles, as well as a number of the latest UAV countermeasures. The company's static display area is divided into long-range weapon, fire control automation equipment, armored combat vehicles, armored vehicles and special vehicle segments. Explosive reactive armor (ERA) and active protection systems, slat armor systems, flexible anti-HEAT screens, radar-absorbent camouflage kits are showcased along with the hardware. In the air defence equipment and UAV countermeasures segment, the Prival, SKPV, RB-504P-E, SkyHunter-4PM/FPV, Argument-3, Fumigator, Serp-VS6, Radiomonitoring, Paltus-1M and Paltus-FPV drone detection and jamming systems are presented. A layered air defence and counter-UAV system is on display at the forum. It is based on the use of advanced radars, automated control systems and air defence systems of various ranges, including the Viking and Tor-M2E SAM systems. ROSOBORONEXPORT's presentation pavilion houses 200+ Russian products presented within thematic segments for ease of navigation. In the guided weapon zone, the 155mm Krasnopol-M2 and 120mm Kitolov-2M guided artillery projectiles, 120mm Gran guided mortar bomb, Kornet-EM, Konkurs-M, Metis-M1 ATGM systems and missiles for them are on display. In the guided munition platform zone, the Kub-E and the latest Lancet-E drones are showcased. Grenade launchers and rounds for them are exhibited in the close combat weapon zone, while radios and the Planshet-A (Tablet-A) mobile automated artillery fire control system – in the artillery fire control aids zone. A variety of Kalashnikov assault rifle models, including the AK-19 and AK-308, the Kord assault rifle, machine guns, sniper rifles, pistols and submachine guns are demonstrated in the standard and special small arms zone. Special small arms are represented by the 5.45mm ADS amphibious assault rifle, 9mm SR.1M semi-automatic pistol, 9mm PP-2000

submachine gun, and precision sniper rifles. Visitors to the presentation pavilion are offered various small arms tuning kits, tactical optics, individual equipment for the special units personnel, non-lethal weapons, RCIED and toxic chemical detectors. In the air materiel segment, ROSOBORONEXPORT is presenting the Su-35 multi-purpose super-maneuverable fighter, IL-76MD-90A(E) military transport aircraft, Ka-52E scout/attack helicopter and precision guided weapons. ROSOBORONEXPORT is ready to show its partners a wide range of aviation equipment on a venue of the United Aircraft Corporation, which is part of Rostec State Corporation. During the forum, ROSOBORONEXPORT will hold public presentations of the most in-demand products in its pavilion: Lancet-E loitering munition system – August 12 at 11:00 a.m. Russian army guided weapons on the battlefield – August 13 at 11:00 a.m. Security equipment – August 13 at 13:00 a.m. Latest Russian counter-UAV systems – August 14 at 13:00 a.m. ROSOBORONEXPORT's digital platforms will help you immerse yourself in the atmosphere of the forum. A teaser video of the forum, video reviews of the exhibit and specific exhibit items, a virtual tour of the exhibition with the possibility of an integrated transition from a general overview of the exhibit items to obtaining more detailed information about them will be available on the official site of the company (www.roe.ru), ROSOBORONEXPORT's channels on YouTube and Rutube, as well as on social networks.
